Education

- **Galgotias College of Engineering and Technology** — Greater Noida, India
  Bachelor of Technology - Computer Science and Engineering (Artificial Intelligence) — *September 2022 - June 2026*
  Courses: *Operating Systems, Data Structures, Design and Analysis Of Algorithms, Artificial Intelligence, Machine Learning, Computer Networks, Databases(DBMS)*

Skills Summary

- **Languages**: JAVA, C++, C, Python, SQL
- **Frameworks**: Spring Boot, Node.js, Express.js, Next.js, React.js
- **Databases**: MySQL, PostgreSQL, MongoDB
- **Core Competencies**: DSA, OOPs, Computer Networks, System Design, REST APIs, DBMS, MERN Stack
- **DevOps And Cloud**: Docker, AWS
- **Tools Used**: Git, GitHub, VS Code, Kafka, Solana, Postman

Experience

- **Alter 8 Concierge, Sikar, Rajasthan** — Remote
  Full Stack Developer Intern — *Oct 2025 – April 2026*
  - **Full-Stack Development**: Developed and maintained 5+ scalable full-stack features improving application performance and usability.
  - **API Development & Integration**: Designed and integrated RESTful APIs improving service communication and backend scalability.
  - **Responsive UI Implementation**: Collaborated with designers and backend teams to implement responsive and user-friendly interfaces.
  - **Debugging & Performance Optimization**: Identified and fixed technical issues while improving application performance and scalability.
  - **Clean Code & Best Practices**: Wrote maintainable code and participated in code reviews following modern full-stack development practices.
  - **Collaboration & Code Quality**: Worked in an Agile development environment, collaborating with developers and designers to build responsive UIs, troubleshoot issues, and deliver high-quality, maintainable software solutions.

Projects

- **Roomora — Hotel Booking Platform** : Built a full-stack MERN hotel booking platform with authentication, room search, reservation management, and REST API integration.

  Designed a responsive React.js interface, implemented reusable components, and optimized API interactions to deliver a seamless cross-device experience.

  Developed responsive UI and scalable backend APIs for real-time booking and user management.

  Tech Stack: MERN (React.js, Node.js), REST APIs, JWT, MongoDB.

- **ZapFlow — Decentralized Automation Platform**: Developed ZapFlow, a decentralized automation platform enabling users to create event-driven workflows ("Zaps") by connecting triggers and actions across services, featuring secure authentication, webhook integration, and asynchronous task processing with Kafka, along with email automation and Solana transaction support for efficient workflow execution.

  Integrated Solana transactions, email automation, and PostgreSQL for secure data management while building scalable backend APIs with Express.js and Next.js.

  Tech Stack: Next.js, Node.js, Express.js, PostgreSQL, Kafka, Webhooks, Solana

Certifications

- **Completed C/C++ and Java programming certifications on Udemy**: Gaining strong foundations in procedural and object-oriented programming (OOP), data structures, memory management, and application development using modern development tools.
- **HackerRank Certified in JavaScript (Basic) and SQL (Intermediate)**: Validating skills in JavaScript programming, relational database querying, joins, aggregations, data filtering, and problem-solving for backend development and data-driven applications.

Achievements

- Qualified JNVST in Class 6 for admission to Jawahar Navodaya Vidyalaya, a merit-based national residential school system. - July, 2014
- Silver Medalist – SOF Mathematics Olympiad (Class 8), secured 2nd rank in class.
- 2nd Rank – Junior Level Science Congress (Class 9) at Cluster Level, and advanced to represent the project at the Regional Level, highlighting research, innovation, and scientific presentation skills.
